Subject RE: OW-9 drilling

oops - got my Aug. and Oct. confused. I meant the schedule e-mailed "August 9th". Sorry for the confusion.

Tom - we are performing the OW9 work as indicated in the schedule e-mailed to you and Chris on Oct. 9th. FYI, we drilled to 143 feet yesterday and e-logged this morning. We are currently installing bentonite chips in the lower portion of the pilot boring (approx. 126 feet - 143 feet bgs) prior to reaming to 90 feet to install the conductor casing. We will likely perform the well installation tomorrow and develop on Friday.

I will scan the lith. and e-log, and e-mail to you and Chris with the proposed screen interval.

Sharon

Hello, Sharon,

is your team drilling OW-9 this week? I have left you a voice message earlier. Also, are you sampling groundwater next week Tu-Th as scheduled? Please let me know.

Thanks,  
Tom
